PROFESSIONAL SUMMARY

Senior Front-End Engineer with solid experience building scalable web and mobile applications using React.js, React Native, Next.js, Expo, TypeScript, and GraphQL. Strong background in frontend architecture, performance optimization, modern tooling, and maintainable codebases. Experienced leading migrations, improving developer workflows, refactoring legacy systems, and solving complex rendering and state management challenges. Product-focused engineer with strong attention to user experience, scalability, and delivery speed.

TECHNICAL SKILLS

- React.js / React Native
- Next.js / Expo
- TypeScript / JavaScript (ES6+)
- GraphQL / REST APIs / Axios
- Redux / Zustand / Context API
- Apollo Client
- HTML5 / CSS3 / SCSS
- Frontend Architecture
- Micro-frontend Architecture
- Performance Optimization
- UI Animations / Responsive Design
- Vite / Webpack
- Git / GitHub
- CI/CD Concepts

PROFESSIONAL EXPERIENCE

Senior Front-End Engineer

- Led frontend improvements for React.js applications integrated with GraphQL services.
- Refactored legacy codebases to improve maintainability, scalability, and development speed.
- Solved performance bottlenecks involving excessive re-renders and inefficient component updates.
- Improved user experience and responsiveness by optimizing rendering flows and frontend architecture.
- Helped establish coding standards and technical best practices across the team.
- Participated in architecture decisions and feature planning with cross-functional teams.

Mobile Engineer

- Built and maintained React Native applications used in production environments.
- Developed reusable white-label mobile app templates for multiple clients.
- Introduced TypeScript into existing projects, improving code quality and long-term scalability.
- Improved app structure, navigation flows, and UI consistency.
- Recommended tools and technical approaches to improve team productivity.

Front-End Engineer

- Developed web platforms using React.js and Next.js.
- Built a job/profession discovery platform similar to Glassdoor focused on the Brazilian market.
- Maintained and evolved investment platforms using React.js and internal design systems.
- Implemented reusable components and scalable frontend patterns.
- Worked closely with design and product teams to deliver high-quality user interfaces.

SELECTED ACHIEVEMENTS

- Migrated frontend projects to modern tooling such as Vite, improving development workflow and build speed.
- Reduced technical debt through refactoring initiatives and dependency cleanup.
- Solved complex race conditions and state synchronization issues in React applications.
- Improved rendering performance in data-heavy screens and complex UI flows.

- Implemented scalable state management patterns using Redux and Zustand.
- Strong experience debugging production issues and delivering stable releases.

EDUCATION & COURSES

- JavaScript, React.js & React Native — Rocketseat
- Ignite React.js — Rocketseat
- Ignite DevOps — Rocketseat
- UX Design — Alura
-

LANGUAGES

- Portuguese — Native
- English — Professional Working Proficiency
